SUMMARY

Computer Science undergraduate specializing in AI & ML with hands-on experience building GenAI and ML applications using LLMs, RAG, vector search, and knowledge graphs. Experienced with Python, FastAPI, Groq, Hugging Face, and AI data-processing pipelines.

SKILLS

GenAI: LLMs, RAG, Prompt Engineering, Vector Embeddings, Semantic Search, Knowledge Graphs

Machine Learning: Scikit-learn, Pandas, NumPy, Feature Engineering, Model Evaluation

Development: Python, Java, JavaScript, FastAPI, React.js, Next.js, Node.js, Express.js

AI & Databases: Groq, Hugging Face, Ollama, Sentence Transformers, PostgreSQL, Neo4j, ChromaDB, MongoDB, Redis

Infrastructure: Docker, Celery, Apache Kafka, REST APIs, Git, GitHub, Vercel, Render

EXPERIENCE

Research Internship

June 2025 – July 2025

Machine Learning Research Intern

SRM University AP

- Analyzed the UCI CKD dataset through data cleaning, feature encoding, normalization, and sampling.
- Trained Decision Tree and Gaussian Naive Bayes models and evaluated their classification performance.
- Achieved **97.5% accuracy and 0.9993 AUC** with Naive Bayes while identifying key CKD predictors.

PROJECTS

MemoryOS: Digital Memory Reconstruction System | GitHub

2026

- Built an AI memory platform that ingests documents, images, and text into searchable connected knowledge.
- Implemented hybrid RAG using vector, keyword, graph, and image retrieval with local LLM-based reasoning.
- Integrated FastAPI, Celery, Redis, PostgreSQL, ChromaDB, Neo4j, and Ollama for the AI pipeline.

ScriptVision: AI Cinematic Breakdown Tool | GitHub | Live Demo

2026

- Created an AI-powered platform that turns screenplays into cinematic breakdowns, shot plans, and storyboards.
- Used Groq LLMs to analyze screenplay scenes and generate structured cinematic recommendations.
- Connected Hugging Face image generation with an asynchronous queue for non-blocking storyboard creation.

FlowForge: Enterprise Workflow Automation Platform | GitHub

2026

- Applied rule-based workflow routing and event-driven processing to automate multi-stage approval pipelines.
- Integrated Redis caching and Apache Kafka to support responsive, asynchronous workflow operations.
- Secured workflow data with Spring Security, JWT, RBAC, and tenant-based access control.

EDUCATION

SRM University, Andhra Pradesh

2023 – 2027

B.Tech in Computer Science and Engineering (AI & ML)

– CGPA: 8.25

CERTIFICATIONS

Agentic AI Certified Foundations Associate

August 2026

SAP Certified – SAP Generative AI Developer

May 2026
