SUMMARY

Computer Science undergraduate specializing in AI & ML with hands-on experience building backend and full-stack applications using Java, Spring Boot, Node.js, React.js, and SQL/NoSQL databases. Strong foundation in Data Structures & Algorithms, OOP, DBMS, Operating Systems, and Computer Networks.

SKILLS

Languages: Java, Python, JavaScript, C++, C

Frontend: React.js, Next.js, HTML, CSS, Bootstrap

Backend: Spring Boot, Spring Security, Node.js, Express.js, REST APIs, JWT Authentication

Databases: PostgreSQL, MySQL, MongoDB, Redis

Core CS: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, OOP

Tools: Git, GitHub, Docker, Postman, Apache Kafka

EXPERIENCE

Research Internship

Machine Learning Research Intern

June 2025 – July 2025
SRM University AP

- Analyzed the UCI CKD dataset through data cleaning, feature encoding, normalization, and sampling.
- Trained Decision Tree and Gaussian Naive Bayes models and evaluated their classification performance.
- Achieved **97.5% accuracy and 0.9993 AUC** with Naive Bayes while identifying key CKD predictors.

PROJECTS

FlowForge: Enterprise Workflow Automation Platform | GitHub

2026

- Architected a visual workflow builder for configurable multi-stage approval processes using React Flow.
- Designed the execution engine to manage approvals, reviews, decisions, notifications, and workflow states.
- Secured tenant-based access with Spring Security, JWT, and RBAC alongside PostgreSQL, Redis, and Kafka.

ScriptVision: AI Cinematic Breakdown Tool | GitHub | Live Demo

2026

- Developed a full-stack platform for converting screenplay PDFs into structured scenes and production breakdowns.
- Built REST APIs for PDF processing, scene extraction, file handling, and structured content generation.
- Implemented authenticated workflows with MongoDB persistence and integrated external processing services.

MemoryOS: Digital Memory Reconstruction System | GitHub

2026

- Built a document and media management platform for organizing fragmented information into searchable memories.
- Designed hybrid search combining semantic, keyword, and graph-based retrieval for contextual queries.
- Connected FastAPI, Celery, Redis, PostgreSQL, ChromaDB, and Neo4j for asynchronous processing and storage.

EDUCATION

SRM University, Andhra Pradesh

2023 – 2027

B.Tech in Computer Science and Engineering (AI & ML)

– CGPA: 8.25

CERTIFICATIONS

Oracle Certified Professional Java SE 17 Developer

February 2026

MongoDB Certified Associate Developer

April 2026
